

D&R On-Air Light – professional signal indicator for you studio

Ensure clear communication in your studio with the D&R On-Air Light, a sleek, high-intensity LED indicator designed to signal when your broadcast is live.

Ideal for radio and television studios, this durable and easy-to-install unit provides clear visibility, minimizing interruptions during critical moments.

Key features

High-visibility red LED display: Bright and clear "ON AIR" indication, easily noticeable from a distance.

Seamless integration with D&R consoles: Directly connects to the MIC-ON output of D&R mixers like Airmate USB, Airence USB, Airlab-DT, and AXUM.

Simple installation: Mounts easily with included hardware and connects via a single stereo cable (tip/ring) to a barrier strip inside the light.

Compact and durable design: Solid steel housing with keyslot holes for wall or ceiling mounting.

Low power consumption: Operates on a 12V DC, 1A external power supply (included), eliminating the need for complex AC switching or relays.

What's included

On-Air Light unit: Features a high-intensity red LED display.

12V DC power supply: Provides the necessary power for operation.

Mounting hardware: Includes all necessary components for easy installation.

User/Install manual: Guides you through the setup process.
