

D&R Hybrid-1 – easy telephone integration for broadcast excellence

Elevate your broadcast capabilities with the D&R Hybrid-1, a compact and efficient telephone hybrid designed to bridge the gap between standard telephone lines and professional mixing consoles. Ideal for radio stations, podcasts, and live events, the Hybrid-1 ensures clear and reliable two-way communication with minimal setup.

Key features

Passive Balancing Interface: Ensures stable and reliable signal integrity without the need for external power.

High-Quality Audio Separation: Achieves over 30dB separation between incoming and outgoing signals, delivering pristine audio clarity.

Adjustable R/C Balance: Fully adjustable to tailor the receive and send audio levels to your specific needs.

Private "TO CALLER" Button: Allows you to temporarily disconnect the caller from the broadcast for confidential discussions.

Compact Design: Housed in a 9.5" metal frame, fitting seamlessly into your existing setup.

Technical specifications

Output: Balanced mic level at –20dBu.
