D&R Webstation: Compact powerhouse for modern broadcasting

Discover the D&R Webstation, a sleek, feature-rich mixer engineered for webcasters, podcasters, and radio professionals with an eye for quality, simplicity, and reliability.

Seamless connectivity & versatility

Comprehensive inputs: Equipped with two balanced, phantom-powered XLR mic/line inputs with inserts for voice processors, along with six stereo line inputs, and three USB channels, plus a dedicated Telephone/VoIP channel, giving you full control over multiple audio sources.

USB Integration made easy: One USB connection handles up to three stereo in/out channels and the VoIP input via your PC, along with control & metering data, ideal for clean, streamlined workflows.

Professional-grade audio

High-quality, low-noise mic inputs with built-in low-cut filters and software-toggleable phantom power ensure pristine voice reproduction.

A musical two-band EQ (±12 dB shelving at 60 Hz low and 12 kHz high) offers on-the-fly tonal control.

Broadcast-ready features

VoIP/Telephone Capable: Easily integrate phone calls or internet-based interviews, perfect for remote contributors and interactive shows.

Assignable user buttons: Twelve programmable buttons allow quick triggers for jingles, cues, or integration with playout systems like Aircast.

Intelligent metering software: Replace outdated hardware meters, this optional display provides real-time visual feedback on master and cue levels, mic status, fader positions, and clock.

Durability meets style

Built into a heavy-duty metal chassis with a powder-coated finish and rounded corners, the Webstation is designed to last, and look good doing so.

Crafted for flexibility, it fits as a desktop unit or can be drop-through mounted for a clean built-in look.

Perfect for small studios & webcasters

Despite its compact footprint, this mixer brings big capabilities, making it an ideal solution for small production studios, at-home broadcasters, web radio stations, and content creators.

Why your audience will Love the Webstation

All-in-one, all-included: Mic, line, USB, plus VoIP, everything's in one console.
Sound clarity: Low-noise architecture, phantom power, and EQ deliver pristine audio.
Intuitive design: Easy setup, smart features like silence detection, and software control means more production, less hassle.

Stylish and sturdy: A robust metal build ensures long-term reliability without sacrificing aesthetics.
Broadcast-ready: Tailored for modern formats, podcasts, streaming, on-air radio, remote interviews, you name it.
