

LICENSE ACTIVATION

For the most recent Aircast software version, please go to www.dnrbroadcast.com and download the trial version on the product page of Aircast. You will find this page on the header "Products" and "Software products". Once it is installed, you can use your received VOUCHER LICENSE ACTIVATION CODE to activate the software.

STEPS FOR LICENSES RUNNING ON SOFTWARE ACTIVATION

- A1. Register at <http://www.aircastradioautomation.com/customer/> and log in.
- A2. Go to "Redeem Voucher"
- A3. Enter the license voucher code you received. A license will be created and should now be visible on the "My Licenses" page.
- A4. Install the software.
- A5. Run the License Manager built into the software.
- A6. Click "Download", enter e-mail/password, select license, and follow the steps displayed on the screen.

During this step your license will be activated using your "Hardware ID" (encrypted checksum of computer hardware).

If you ever need to move the license to another computer, or the Hardware ID changes unexpectedly, you can go to the My Licenses page and reset the activation, then repeat steps A5... A6.

STEPS FOR AN UPGRADE

We must know which of the existing licenses (dongles) to upgrade.

Please provide us this information. You can look up the dongle S/N in the License Manager (Hardware tab, in the list of Hardware IDs, prefixed by "SG:..."). Then follow the steps for licenses running on software activation as explained above.

STEPS FOR DONGLE LICENSES not sold anymore since 2018 (only for existing customers)

- B1. Register at <http://www.aircastradioautomation.com/customer/> and log in.
- B2. Go to "Redeem Voucher"
- B3. Enter the license voucher code you received. A license will be created and should now be visible on the "My Licenses" page.**
- B4. Wait for the delivery of the dongle.
- B5. Send an e-mail to mail@d-nr.nl, confirming that you have received the dongle.
Please state the 8-digit hex dongle serial number printed on the small plastic bag, and your license serial number (five-digit number, displayed on the My Licenses page).
- B6. We will now link the dongle to your license. Wait for confirmation e-mail.
- B7. Install the software.
- B8. Run the License Manager built into the software.
- B9. Click "Download", enter e-mail/password, select license, and follow the steps displayed on the screen.

Note to dongle users:

If you have already received the license voucher code via e-mail, but the dongle has not been delivered yet, you can start with using the software in software activation mode (steps A1... A6).

As soon as you have received the dongle, continue with step B3.
